- Applications

HEALTH FITNESS

The next popular category of wearable devices is fitness tech. Like pedometers before them, these apps track activity but also connect to your body to get a more accurate reading of your health and fitness goals.

CARMIN'S

Vivo-Fi Active Tracker

The Vivo-Fi is a smart wristband that tracks your steps and distance traveled.

Once you have used it enough, it calculates your daily activity and will make sure you are not falling behind.

SENSORIA'S

Smart Fabrics

T-shirts, socks and sports bras communicate with a smart phone app to track.

SAMSUNG'S

Gear Fit

The Gear 2 and Gear 2 Neo can also stream music to Bluetooth headphones.

- Heart rate
- Distance

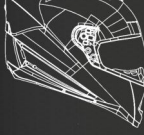

SAFETY AND SECURITY

The applications of wearable tech are enormous - from improving safety on the road to the safety of your data on the web.

SKULLY'S

Skully AR1 Helmet

A protective helmet for motorcycles.

- Navigation
- Eye

ZACHEE'S

Turn Signal Gloves

Wearable cycling gloves with a built-in LED turn indicator.

A metal switch between the thumb and index finger allows wearers to intuitively.

BIONIM'S

Nymi

A wristband that uses the wearer's unique cardiac rhythms to confirm identity.

LIKE FINGERPRINT ID, NYMI COULD PROTECT KNOWLEDGE WE'VE TO

- Lock
- Unlock

SENSOREE'S

Ger Mood Sweater

This colorful sweater reads emotions from sensors in the hands and then translates the data into colors, which are displayed in the sweater's high-contrast color.

- Calm
- Excited
- Nervous
- Happy

EVERPURSE'S

Everpurse Collection

This fashion and tech-forward purse comes with a special cordless charging pocket for smart phones.

The phone charged by a cordless docking system. The purse is charged by a wireless inductive charging mat.

WE-EX'S ALERT SHIRT AND FUNDWEAR

Alert Shirt

A sports jersey that would allow fans to physically feel when their team is happening during a live game.

Fundawear

Handmade garments that allow touch to be transferred from a smart phone app to make sense of the fabric.
